

Prepare for Severe Weather in Your Area

As a result of last year's severe weather events, GuideOne policyholders submitted a total of 1,701 claims related to storm damage, averaging \$40,341 per claim. Claims and repair costs are increasing more than ever this year, which is why GuideOne has put together these tips to protect your organization's property and finances from devastating damages.

Before the storms roll through, be proactive in accomplishing beneficial tasks such as:

Routinely trim dead branches off trees

Secure outdoor objects that can blow in strong winds

Have food, water, radios, and a first-aid kit on hand

Social Inflation — Why it Matters to You

'Social inflation' is one of the latest buzz words that describes the rising costs of insurance claims, which results from increased litigation and higher jury awards. Social inflation is fueled by societal trends we hear about daily in the news, including sexual harassment, discrimination and social justice. To help reduce your organization's chance of a costly allegation, it's important that you equip your members with the right knowledge and training to keep those you serve safe.

GuideOne's GuideVantage programs offer your organization specialized resources that can help reduce the chance of a misconduct allegation, ultimately protecting your organization from litigation. You can access sexual abuse awareness training, sample policies and procedures, tools for monitoring and oversight, and more through our alliance with MinistrySafe and Abuse Prevention Systems.
