Midwest Territory Wins & Updates

November 2020 GuideOne Monthly, Mark Jacobs' Territory

Our Nonprofit & Human Services and Education programs have been successful in all states so far this year. We won accounts that had very limited markets prior to discovering GuideOne's program. Check out our [Q3 Wins](#) to see where our distribution partners are experiencing success.

Did you know that GuideOne writes Workers' Compensation (Work Comp)? While we are known as a specialty carrier in the Religious Organizations niche, we also offer monoline Workers' Compensation for many social service organizations across the country. In order to qualify for a monoline Work Comp policy, accounts must be over \$100,000 in premium, and fall within the classes we write. Check out our [large Work Comp appetite guide](#) for more details. If you have a social or community service organization with a large Workers' Compensation policy, consider a quote with GuideOne!

Religious Organizations and Nonprofit group policy programs are a specialty at GuideOne. We have long been a leader in writing Master Policies for multi-location accounts, and grouping accounts together under a single program that brings additional value. This fall, we are looking at numerous opportunities in the Midwestern Territory to provide better group program options for Religious Organizations and Nonprofit Associations. Visit the [GAP/Master page](#) of GuideLink for additional program details, and read about some of the unique denominational program advantages we offer. Feel free to reach out to me directly to discuss any new opportunities you may have!
